

The Parts You Need, Delivered Quickly

The Right Parts

AEC's parts team stocks OEM parts for the manufacturers we represent at competitive prices. OEM parts are subject to rigorous manufacturer testing before their approval. The superior quality of OEM parts compared to aftermarket parts ensures the best performance in maintained equipment, leading to fewer service runs. We offer the correct HVAC parts your jobs require.

Your Success is Our Success

Our customers' success is our primary concern; when you call us each of your requests receive the individual attention and concern needed to identify the correct parts quickly and correctly. Whenever possible, you receive a quote the same day, often within the hour. We can be reached directly Monday - Friday from 8am to 5pm EST.

Parts Stocking Program

We stock the parts your service jobs require. We house thousands of parts for the manufacturers we proudly represent and will stock requested parts when asked. Most shipments to customers are received the next business day. From OEM motors to controls, we carry the parts you need to get your customers up-and-running as quickly as possible.

Request a Quote

Air Equipment Company offers more than new complete systems. We supply thousands of replacement and spare parts, with the most common items usually in stock in our office.
